

Research Introduction

 Faculty of Agriculture, Yamagata University

Laboratory of Vegetable Science

Main Research Subjects:

Disease control of horticultural products using Electrolyzed water

Eco-friendly disease control of horticultural crops is an important subject in the field of horticulture. In my laboratory, Electrolyzed water has been used for controlling diseases of seedlings and harvested fruits.

Hope For The Future

- Let's enjoy your college life with us!!

Malformed strawberry fruit

Microcracking of the epidermis in tomato fruit

S-0028 2011/07/20 H D8.7 x40 2 mm

Spongy tissue in ripe mango fruit

What are we studying more?

“Wild Chilean strawberries”, “Partitioning of photo-assimilates”, “Plant stress physiology” and “Physiological traits of wild eggplants” . Please visit our URL for the details.

Belongings: Safe and Reliable Agricultural Production Course

Research Field: Horticulture

Self Introduction: Professor & Dr. **Takashi NISHIZAWA**

Please contact me by e-mail if you are interested in our research fields.
